

**ONLINE SEMINAR**  
**ROAD SAFETY AUDIT – TR-540 MANUAL  
UPDATE AND COMMON RSA PROBLEMS**  
**DATE & TIME: 13 May 2025: 18:00 – 19:00 GULF STANDARD TIME**

## ABOUT THE EVENT

The Integrated Transport Center (ITC) of Abu Dhabi has been undertaking a number of studies and manual updates recently aligned with Vision Zero. The strategy focuses on eliminating road traffic deaths and serious injuries by adopting the Safe Systems Approach, which prioritizes creating a safer road environment.

One of the actions has been to update the Emirate of Abu Dhabi Road Safety Audit Manual, TR-540, integrating the Safe Systems Approach. This webinar looks at what is in the forthcoming update and explains how the Safe Systems Approach will be integrated into TR-540.

The second part of the webinar will look at common issues seen by road safety auditors throughout the region, how to avoid these problems in the design and various solutions aimed at minimizing issues raised in the RSA report.

## ABOUT THE SPEAKER

**David George** is Road Safety Specialist for ITC Al Ain & has specialised in road safety engineering since 1996. He has led teams on thousands of road safety audits in UK, Europe and Middle East, as well as writing, developing and presenting a range of road safety training courses, speaking at various national conferences, and appearing on television on road safety issues. David is a past Vice-Chair of the Society of Road Safety Auditors, SoRSA.
